

# SATURN FLIGHT SIMULATOR

**PATENTED | DISRUPTIVE**

Simulator with Full Unrestricted 360° rotation on Yaw, Pitch & Roll, along with linear Heave motion. Boundless training device for entire spectrum of flight training including : Initial, Recurrent, Single & Multi Engine, Type Rating, Instrument, Aerobatics, Unusual Attitudes, Upset & Stall (UPRT) Recovery, Combat, Agriculture, Fire-fighting

## Market

USD \$40+ Billion  
Additional 600,000  
Pilots  
by 2025

## Advantage over existing simulators

- ◆ Full Unrestricted 360° rotation
- ◆ Comparatively low cost of acquisition, operations, maintenance
- ◆ No major infrastructure or facility upgrades required

## Profit & ROI

Extremely High net  
Profit Expected  
High Profit-  
Expense Ratio

## Investment Required

**\$12 million**

Phase I - Engineering (vetted) ----- \$ 5 million

Phase II - Prototype & Production ----- \$ 7 million

## Investment Disbursement

Phase I - Engineering (\$ 5 million), to be utilized for engineering/design firm (vetted) & professionals for mechanical, electrical, avionics, audio & visual and other hardware/software design & integration for prototype

Phase II - Production (\$ 7 million), to be utilized mainly for material, hire talent, facility, certification, marketing and production

## Price

Targeted around  
USD \$6 million/sim

## Revenue

- ◆ Direct sale to Airlines, Government & Aviation Training Facilities
- ◆ Maintenance & Service Contracts
- ◆ Simulator lease-out and open own training facility
